

CLEANERS & STRIPPERS

Nu-Clean Concentrate Cleaner

PRODUCT DESCRIPTION: RoVal NU-CLEAN CONCENTRATE CLEANER is a complex balance of powerful detergents, surfactants and cleaning solvents that combine to form an extremely effective, industrial strength, all purpose cleaner, degreaser and wax remover. NU-CLEAN CONCENTRATE CLEANER was designed by RoVal Manufacturing and recommended for the cleaning of all types of hard flooring, including ceramic tile, natural stone, masonry and composition tile and can be used in conjunction with a floor machine for large commercial areas. NU-CLEAN CONCENTRATE CLEANER easily strips old wax build up and cleans heavily soiled areas, preparing the floor for restoration or the application of floor finishes. NU-CLEAN CONCENTRATE CLEANER does not contain acid and will not etch marble surfaces. NU-CLEAN CONCENTRATE CLEANER is water soluble and nonflammable.

RECOMMENDED FOR USE ON: All types of sealed hard surfaces including synthetic flooring, ceramic tile, Mexican Saltillo tile, marble, other natural stone and masonry floors. Because of its high concentration and degreasing capabilities, it is excellent for use as a steam cleaning and pres-sure washing compound to remove grease and heavy soil deposits from walls, mechanic garage floors, engines and other heavy equipment. When properly diluted, NU-CLEAN CONCENTRATE CLEANER may be used to clean plastic and vinyl patio furniture, linoleum, rubber, white wall tires, kitchen ovens and range hoods.

SURFACE PREPARATION: Remove any loose debris, dirt and dust by sweeping, vacuuming or wiping with a cloth.

DIRECTIONS FOR USE:

FOR REMOVING OLD WAX BUILD UP:

Dilute 1 part NU-CLEAN CONCENTRATE CLEANER into 1 part clean water. Mop the solution liberally over a small area (approximately 50 square feet). Allow the solution to stand 2 to 5 minutes. Use a short nylon bristle brush for stubborn areas while they are still wet. For larger areas, use a floor machine. Remove the residue with a wet/dry vacuum cleaner or by continuous mopping. Do not allow the residue to dry on the floor. Continue this method until all the wax has been thoroughly removed from the entire area. Rinse the area extremely well (at least twice) with clean water and a clean mop. Make sure all residue and haze has been removed. Inspect the floor and spot clean any stubborn areas that may re-quire additional attention. Rinse again to neutralize the floor with a solution of RoVal TILE & STONE CLEANER and water and allow the floor to completely dry.

FOR NORMAL CLEANING: Mix 2 to 4 ounces of NU-CLEAN CONCENTRATE CLEANER with each gallon of clean water. Wipe area with the solution on a clean mop, rag or sponge. Rinse area thoroughly with a clean mop, rag or sponge and clean water.

FOR HEAVY DUTY CLEANING: Mix 1 part NU-CLEAN CONCENTRATE CLEANER into 1 part clean water. Wipe the area with the solution and scrub same with a short nylon bristle brush. Rinse area thoroughly with a clean mop, rag or sponge and clean water.

PACKAGE SIZE: 12/1 quart case, 6/1 gallon case, 5 gallon pail, 30 and 55 gallon drums.

SPECIAL NOTES:

1. Always test this product first to ensure suitability for your intended use.
2. Floors become slippery while using this product. Exercise caution to avoid slip and fall.
3. Prior to using this product, protect all baseboards and areas of direct exposure to avoid being affected by the cleaner.
4. Keep from freezing.
5. Keep away from children.

SPECIAL PRECAUTIONS: Caution! Corrosive! Always wear protective clothing, i.e. gloves, splash goggles, etc. when using this product. Do not allow cleaner to come in contact with skin or eyes.

IN CASE OF SKIN CONTACT: Immediately wash skin with large amounts of running water for at least 15 minutes. Remove contaminated clothing. Launder clothing before reuse. If irritation persists, seek medical attention.

IN CASE OF EYE CONTACT: Immediately flush eyes with large amounts of water for at least 15 minutes while holding eyelids apart to ensure rinsing the entire surface of the eye. Obtain immediate medical attention.

IN CASE OF INHALATION: Remove to fresh air.

IN CASE OF INGESTION: Do not induce vomiting. Keep victim warm and quiet and obtain medical attention. If conscious, give large amounts of water or milk.

TECHNICAL PROFILE:

Viscosity:	Water Thin
Solvent:	Water
Active Solids:	N/A
Spec. Gravity:	1.0
Appearance:	Pink Translucent Liquid
pH:	12
Shipping Name:	Potassium Hydroxide Solution

*Water Rinseable ♦ Nonflammable ♦ Concentrate ♦ Fast & Effective ♦ Industrial Strength ♦
Will Not Etch ♦ Safe For Natural Stone*
